K376

HIGH-PERFORMANCE IN-EAR HEADSET

STUDIO-QUALITY SOUND, ALL-DAY COMFORT AND CALLING-TAKING CAPABILITY.

Why are so many professional musicians comfortable using AKG headphones? Is it the more than 60 years of AKG expertise engineering the precise, studio sound that top artists demand? Is it the 1,400 patents or the two TECHNICAL GRAMMY® Awards for audio innovation? Or is it simply because they, like you, want uncompromising sound quality for their music? AKG K376 in-ear headphones offer comfort that extends beyond your choice of headphones. They keep you listening to your favorite music all day with a combination of high-performance sound and incredible comfort. AKG K376 headphones come with three different sizes of soft, malleable silicone sleeves that will fit snugly into ears of every shape. Aluminum housings provide superior acoustic dampening and extended bass response, while the closed-back design helps keep outside noise from disturbing your listening experience. A one-button remote allows considerable ease in navigation of media, with minimal effort, and an in-line microphone enables you to use AKG K376 headphones while making a phone call, giving you yet another reason never to take them off. So if you want lightweight, comfortable in-ear headphones that deliver studio-level sound, the K376s are calling.

FAMOUS AKG® SOUND QUALITY

For over 60 years, AKG Acoustics has been the leader in creating studio sound in headphones. We hold over 1,400 patents for our groundbreaking products; and two TECHNICAL GRAMMY® Awards (2010, 2005) for sound innovation.

ALUMINUM HOUSINGS

The housings on the AKG K376 headphones are made of aluminum, which provides superior acoustic dampening, extends bass response and reduces the resonances that can compromise sound quality. Aluminum gives the headphones an elegant finishing touch and helps keep them lightweight and comfortable.

IN-LINE MICROPHONE

AKG K376 in-ear headphones have an in-line microphone, so that you can make calls that are every bit as crisp and noise-free as the music you listen to on your smartphone.

ONE-BUTTON REMOTE

AKG K376 in-ear headphones also come with a smart one-button remote that allows for easy navigation of media with minimal effort.

SILICONE SLEEVES IN THREE SIZES

A thoroughly inspiring listening experience begins and ends with comfort. AKG K376 in-ear headphones come with soft, smooth silicone sleeves in three different sizes so that they will fit into ears of all sizes, comfortably and snugly from the beginning of a playlist to the end.

CHOICE OF TWO COLORS

Your music has style, so it makes sense that your headphones should too. With AKG K376 in-ear headphones, you can choose between models in black or white.

CLOSED-BACK DESIGN

AKG K376 in-ear headphones keep music in and noise out. Their closed-back design helps impede outside noise from entering your ears while also preventing the sounds that you're hearing from leaking out for the outside world to hear.

CARRYING POUCH

Nothing slows down the listening process like having to undo a twisted knot of headphone cord. AKG K376 in-ear headphones come with a carrying pouch so that you can store them safely and help keep the cord from becoming an unruly ball of tangles.

WHAT'S IN THE BOX

- 1 set of AKG K376 in-ear headphones
- 3 pairs of silicone sleeves (S, M, L)
- 1 3' 11-1/4" (1.2m) cable
